

Why Truline?

FOR BARRIER/ CUT-OFF WALLS

- Will restrict horizontal water flow and migration.
- Will contain contaminates and chemicals and restrict migration.
- Will restrict soil erosion.
- Is non-permeable.
- Is chemical resistant, non-chalking, UV protected.
- Does not require joint sealants when filled with concrete.
- Double-wall protection.
- Will not “unzip” in the lock/joints above or below surface.
- Provides engineers and contractors with design and fill options depending on the job site and application
- Creates a much stronger wall with reinforced steel and concrete fill.
- Installs using traditional installation methods and equipment.
- Design provides better joint strength in corners and radiuses.
- Manufactured by only one company, enabling complete control over design, production and delivery.
- 50-year limited warranty.
- Cost efficient.
- Made of 94.6% post-industrial recycled material.
- Both actual and theoretical specifications are published.
